#### ABSTRACT

*The pharmacological and phytochemical studies on cardiospermum helicacabum linn medicinal plant have been carried out by employing standard methods. The present research investigation is significantly focused on In vitro and In vivo anticancer activity of ethanolic and aqueous extracts of medicinal plant roots. From the present research study, it is clearly evident that the ethanolic extract and aqueous extracts of roots of medicinal plant exhibited the anti cancer activity. The phytochemical and anticancer activity of cardiospermum helicacabum roots has been evaluated on mice with novel approach.*

**Keywords:** Cardiospermum helicacabum Linn, extracts, Phytochemical, Anticancer.
