

# Journal of Applicable Chemistry

2016, 5 (1)

(International Peer Reviewed Journal)

---

## EDITORS DESK

### Let knowledge grow from more to more and thus human life be enriched

I thank referees from India and abroad for shrewd security of manuscripts with their expertise to uphold the quality of Journal on the International Interdisciplinary Map. My gratitude to editorial board members for sparing their academic time amidst committed schedules to guide and advise the executive editors to bring forth a new dimension to JOAC.

Last year, we introduced ICE (Inspired Chemical Education) and published information about Nobel Prize topics of chemistry in this decade, Nobel laureates of 2015 and Advancement Application Announcement (AAA) feature. From now, a new head HOT ICE (Hands-on-tutorials for Intelligent Chemical Education) under pedagogy is introduced.

I welcome experts on the editorial board to shed light on holes and bridge the gap for a balanced and sustained research/pedagogy growth in the time to come. Based on the recommendation of expert committee, the best research paper award of the year 2015 was announced.

The layout of Journal was upgraded. We commit to introduce a few more sparkles to match with the surge of new cross disciplinary research and upward trend in existing experimental methods, instrumental techniques, data processing and knowledge extraction with a focus to bring forth intelligence bits through heuristic/exhaustive churning of ocean of peta-scale information. We invite manuscripts under these heads for the forth coming issues.

**This journal is in memory of my better half Smt. Kaza Indira Devi.**
