ABSTRACT

In India, Self Help Groups (SHGs) is making headway in its effort for reducing poverty and empowering rural women. Women participation in SHGs have obviously created tremendous impact upon the life pattern, style and have empowered them at various levels. Presents paper attempts to assess the role of SHGs in women empowerments in Godda District of Jharkhand. The study was attempted to examine whether women's involvement in various activities of the group makes any positive change on women social empowerment. The information required for the study was collected using a well-structured and pre-tested interview schedules targeting SHGs member along with group discussion method which facilitated the collection of qualitative data from the group. In the present study along with nature of income distributions, the extent of income inequality is also discussed. So, this study has been devoted to analyze the distribution of income inequality of the sample respondents before and after joining SHG in the study area.
