➤ **National Conference on Climate Change: Past, Present and Future on 12th and 13th January 2015**

Climate change is of special interest to the natural and social scientists as it is threatening the very existence of the human beings. Although the effects of climate change are felt in the modern times, it has been a natural phenomenon throughout the geological history. In order to have a debate and cross disciplinary discussions on this very important issue we invite you to participate and contribute a paper in the National Conference on Climate Change: Past, Present and Future (Monday and Tuesday 12th and 13th January 2015) organized by the Department of Geology, Poona College, Pune 411001.
