Kaza Somasekhara Rao <sr_kaza1947@yahoo.com>

It gives me immense pleasure to declare that my colleague is doing formidable job of keeping the Journal Of Application Chemistry in good status. I really admire his patience and perseverance to keep the Journal get going with so much of problems of not only finances, but also the man-hours one has to put as the Editor-In- Chief. I sincerely wish him profound success in his academic Endeavor. This is praiseworthy especially after superannuation.

I have a long standing experience of being an Editor of Journals. As the Editor, I know thoroughly well where the shoe pinches. The task of the Editor is very delicate, he has to keep the Authors cheered but at the same time he has to maintain the quality as well as the standard of the publication. My friend Dr. Kaza has passed both critical tests and proved to be successful editor. What I am mostly cheered is the kind of research papers he is publishing. The very fact the impact factor is so good and the cleanly proves that several abstracting agencies are including the summary of papers published in the Journal of Application Chemistry is commendable. I take this opportunity to congratulate Dr. Kaza Somasekharan Rao for doing great service to the Scientific Community. I wish him profound success in all his academic endeavors.

Professor S M Khopkar
