

Journal of Applicable Chemistry

2021, 10(1)

(International peer reviewed Journal)

EDITOR'S DESK

JOAC, a research outlet in chemical sciences, entered tenth year in 2021. On behalf of editorial staff, I wish the contributors and followers of the journal a fruitful research blossom emerging trust worthy outcome in trans-disciplinary projects with an undercurrent of extant chemistry. My deep sense of gratitude is to academic scientists/industrial researchers in our home country and abroad who spared their time in review process amidst their tight scheduled chores.

The advisory committee has been striving hard for smooth run of the journal upholding the innate urge of reducing knowledge gaps and sustaining local as well as global academic urges making use of state-of-art knowledge tools.

This year's best paper award, as judged by a three-member-committee of experts, goes to Talasila Srinivasa Rao (of Dr. Reddy's Laboratories Limited, Process Research and Development, API Plant, Telangana, India) for the paper entitled "CSA-Catalysed one-pot synthesis of 1,2-dihydroquinazolines" which was published in first issue of JOAC 2020.

I thank Dr. Gudipudi Kishore, and Smt. Bezawada Naga Krishna Vani, Executive Editors, for bringing out the issues of the journal on time and overall monitoring academic content. K.Kalyani Sekhar, M E., a committed member of the team, continued to play a key role in publishing the journal in addition to an upward trend in his professional career as a Software Consultant.

The web viewers of this site exceeded two lakhs and seventy-five thousand.

This journal is in memory of my better half Smt. Kaza Indira Devi.
