Visakhapatnam (India)

I am extremely happy to note that JOAC entered tenth year of research publication in chemistry. The content is relevant to areas dealing with applications in Chemistry and is of appreciable standard. I thank Prof. Kaza.S.Rao for nominating me in the Advisory board. I am sure it will continue in the field for many more years to come and cater to the needs basic/interdisciplinary chemists of twenty twenties.

With best wishes

(U. Murali Krishna)

Associate Editorial Member, J. Applicable Chemistry

e-mail: varsitvkm@email.com. mannamkm@vahoo.co.in

The Chemistry is an important subject in basic sciences. It has extended concepts with pharmacy, physics, biology, agriculture, medicine, environment, industry and technology. While the concepts of chemistry improve understanding ability, chemistry applications are important in the day-to-day life of humankind.

I am happy to note that the *Journal of Applicable Chemistry* is entering into the tenth year of interdisciplinary service to educate and inform research results to chemistry teachers, researchers and practitioners.

Research papers, reviews, events and notes published in the journal for the last nine years have reached its readers and subscribers with great satisfaction. I strongly hope that the objectives of the journal will help the society with useful academics in many more years to come.

Greetings and regards

(Mannam Krishna Murthy)
